

Victorian public sector employment matrix

This matrix provides a quick reference for careers coordinators to provide relevant advice to secondary students on the careers available within the Victorian Government.

The matrix provides a table of job categories (e.g. Agriculture, Land and Environment) and job families (e.g. Administration; and Communications and Media). These are then cross referenced to departments, authorities, offices and entities offering employment choices in these areas.

Careers coordinators can use the information in the matrix to match students' areas of interest and direct them to a relevant department, authority, office and/or entity for more information.
